Post Windows 2004 Update Reconfiguration Guide
Reconfigure G-Force, Audio & Registry Settings

1. Select the Maintenance tool from the start panel.
2. Select add or remove components. Click next.
3. Un-check the G-Force and NO Registry Config components. Click next.
# Select Components

Select the components to install. Deselect installed components to uninstall them. Any components already installed will not be updated.

Installs NO BLT Language features on your computer.
This component will occupy approximately 40.00 bytes on your hard disk drive.
4. Click update.
5. When uninstallation is complete, click finish. The system will now reboot.
6. After rebooting, launch NeurOptimal. You will be prompted to update G-Force and the NO Registry Config. Click Download & Install Updates.
7. When prompted, click yes to the installer.

8. After installation completes, you will need to reboot your computer.
9. After rebooting, right click on the sound icon on the taskbar and select “Open Sound settings”.

![Open Sound settings](image)
10. In Sound settings, open the Sound Control Panel.

Sound

11. You will first see the playback tab. Verify that speakers are still set to default. Select the recording tab.
12. In the recording tab, verify microphone array is set to default.
13. Right click Stereo Out and open Properties.
14. In properties, go to the Listen tab. Check “Listen to this device”, with playback through “Default Playback Device”.
15. Launch NeurOptimal. When G-Force opens, right click within the visualizer, change the audio input source to Stereo Out (SoundSpectrum Audio Cable).
Reconfigure USB Power Settings

16. Right click on the Start Button in the bottom left corner of your screen.

17. Select the device manager in the menu that appears.
18. Open up the Universal Serial Bus controllers sub-menu. For Surface Book 2 users, there are some additional devices (second picture below).
19. Uncheck “Allow the computer to turn off this device to save power” on all the following components. If you don’t have a Surface Book 2, you can ignore the last picture.
USB Root Hub (USB 3.0) Properties

- Allow the computer to turn off this device to save power
- Allow this device to wake the computer

OK Cancel
Generic SuperSpeed USB Hub Properties

- Generic SuperSpeed USB Hub

- Allow the computer to turn off this device to save power
- Allow this device to wake the computer

[OK] [Cancel]
